## Map Information

Heavy rains affected Rhineland-Palatinate area where a severe flood event is expected over the next few days along the river Moselle. The German Joint Information and Situation Centre (GMLZ) triggered the Copernicus EMS Rapid Mapping Service to monitor the flood evolution.

The present map shows the damage grade assessment (Grading maps) in the area of Bad Neuenahr-Ahrweiler (Germany). The thematic layer has been derived from post-event satellite image by means of visual interpretation. The scale of analysis is 1:5000.The estimated geometric accuracy (RMSE) is 1.25 m or better, from native positional accuracy of the background satellite image. The minimum mapping unit (MMU) is 100 sq m.

## Disclaimer

Products elaborated in this Copernicus EMS Rapid Mapping activity are realized to the best of our ability, within a very short time frame, optimising the available data and information. All geographic information has limitations due to scale, resolution, date and interpretation of the original sources. No liability concerning the contents or the use thereof is assumed by the producer and by the European Union.

Delivery formats are Layered Geospatial PDF, GeoJPEG and vector (ESRI shapefiles, Google Earth KML, GeoJSON).

Map produced by Telespazio Iberica released by SERTIT (ODO).
